WORK EXPERIENCE

Freelance Web Development

2020-Present

Full-stack Web Developer

Remote

- Designed, developed, deployed, and maintained websites according to client specifications.
- Utilized modern web technologies including JavaScript ES6, CSS3, HTML5, React, and Next.js.
- Provided clients with customized CMS portals backed by technologies such as PostgreSQL and S3.
- Adhered to web accessibility standards and guidelines such as use of semantic HTML.

Appen Limited

2016-Present

Internet Analyst

Remote

- Assisted with evaluation of user data to improve services for one of the largest search engines in the world.
- Constructed detailed technical comments outlining the reasoning behind my decisions.
- Completed work adhering to performance expectations evaluated through monthly reviews.

Free I.T. Athens

2014-2016

Volunteer

Athens, GA

- Helped diagnose and resolve technical issues while providing technical support and advice to customers.
- Demonstrated proficiency in working independently, taking initiative in various tasks and responsibilities.
- Trained other volunteers in problem-solving and computer-building techniques.

PROJECTS

[Klink](#)

Social media microservice backend utilizing both REST (Python, FastAPI) and EDA (Go, RabbitMQ) featuring automated end-to-end testing, centralized logging, and containerized deployment.

[Rebook](#)

React ebook reader with bookmarks, highlights, and annotations, all of which can be exported to markdown, utilizing modern React standards like hooks and functional components to ensure a maintainable codebase.

[Open-source Contributions](#)

Contributions to the open-source community including new features, documentation, test cases, and collaborating with a team to resolve issues in projects such as [KMK firmware](#).

[PyWinModal](#)

Productivity tool for Windows for easily executing user-defined commands through a customizable modal, demonstrating proficiency in creating user-friendly solutions for real-world problems.

Server Management

Planning, deployment, and maintenance of servers with containerized services such as GitLab, PostgreSQL, and Fluentd, providing hands-on experience with industry technologies.

OTHER INTERESTS

Game design & development, culinary arts, music, homelabs, custom-built keyboards, learning new things
